# Vision & Mission

**VISION**

**Vision**

Our mission is to deliver high-quality, natural, and scientifically supported products that promote the health of aquatic species, improve farm productivity, and ensure the sustainability of aquaculture. We aim to be the trusted partner of aquaculture businesses by providing effective solutions that enhance fish growth, prevent disease, and improve environmental management.

**MISSION**

**Mission**

Our vision at VLS AQUATIC SOLUTIONS Bio Remedies is to be a global leader in providing sustainable, innovative, and bio-based health solutions that transform the aquaculture industry. We strive to promote healthier aquatic ecosystems, support the growth and productivity of aquaculture farms, and lead the way in reducing the environmental impact of farming practices. Through our commitment to scientific research, natural remedies, and sustainability, we envision a future where aquaculture is both a thriving industry and a steward of the environment, contributing to a healthier planet and a sustainable food supply for generations to come.

## PRO - 33

Synergistic effect of microbes helps in decomposition of diverse type of organic matter, Eliminates harmful gases like ammonia, hydrogen sulphate & nitrite. Balances the phytoplankton for healthy fish growth. Improves sludge digestion.

## GROW - 33

Covers the Vitamin Deficiencies' and avoids related symptom's and lesions. Covers the related symptoms and lesions Feeds utilized effectively by better digestion absorption and assimilation of nutrients Culture period reduced and more profits with glance by 1. Strong health 2. Strong immunity 3. Better and faster growth 4. More body weight 5. Less bacterial diseases

## AMMONIFICATION

**AMMONIFICATION** is an effective alternative to maintain equilibrium of pond Flora and Fauna, without affecting normal behaviour of Shrimp, in turn support shrimp, to face sudden changes in pond water parameters during peak demand hours of dissolved oxygen.

## RICH - PS

## RICH - PS

Utilizes and reduces HS in water column and soil.

Promotes the non-pathogenic bacteria over pathogenic types.

Oxidizes the organic matter and reduce black soil problems

Reduces the white faeces and white gut problems.

Promote stress free environment and increase the production.

## M - M - 14

| Improves Absorbption of Nutrients |  
 Improves Skeleton & Muscle strength |  
 Shell Hardening after Moulting | Relief  
 from Stress Condition & Quick Moulting  
 | Improves shrimp and Prawn Immunity |  
 Decreases the Growth of Pathogenic  
 Bacteria | Improves Disease Resistance |  
 Reduce Production Cost & Culture
